

SALMET®

MEC-10 Mechanical Egg Counting System

Monitor the output of your egg production up to 99,9% **accuracy** in real time

Why choose the MEC-10 system:

- High accuracy up to 99,9%
- Real time insight
- Available for all layer cage systems with an eggbelt width of 100 mm and up to 12 tiers
- User-friendly interface
- Data exportable

... for your success!

MEC-10 Mechanical Egg Counting System

The SALMET MEC-10 registers the number of eggs in your poultry house and gives you a real time insight to the production of your eggs. The MEC-10 has been designed especially for systems that don't have a central management computer and is giving an easy overview of produced eggs for the farmer.

High accuracy

There is no influence of dust, dirt, flies, light influence which guarantees an accuracy level up to 99,9%. Maintenance of this unique Salmetsystem is extremely low.

User-friendly interface

A 7" touchscreen gives you access to the data. Check the daily output per house, per row and per tier.

Data exportable

The data are available at any time and on any device

About SALMET

Apart from being a manufacturer of poultry equipment, Salmets is also one of the larger poultry producers in Germany, so we know what it means to design and produce poultry equipment. We use what we produce!

SALMET®
