

**SALMET®**

# PS 2800 layer breeder system

Designed to **maximize** hatching  
**egg production** and **fertility**.

## Why choose the PS 2800 system:

- Clean eggs – essential for hatchery
- Highest level hatching eggs
- Better FCR compared to floor systems
- Very low mortality rate
- More birds per house
- Uniform growth

*... for your success!*

# PS 2800 layer breeder system

The PS 2800 layer cage for parent stock guarantees maximum hatching egg production and fertility. The system is available from 2 till 6 tiers. The side partitions of each section are designed to ensure social contact between the birds. Also the even distribution of light is guaranteed.

The cage bottoms are made of cross and longitudinal tensile wires of the same thickness that present a smooth surface for improved egg roll-out. The middle of the cage floor is enforced to ease natural mating. 2 drinking lines are installed at each tier one of the lines is adjustable. This assists with flocks where uniformity is somewhat uneven and enables smaller birds to reach the nipples.

#### Uniform feed

The right feed conversion system is a core factor to success and operating efficiency.

As an expert, Salmet has continuously improved the technical standard of the feed hopper and achieves best results.

The up-to-date feeding system meets the desired quality and quantity requirements for each bird and avoids feed waste and over consumption by keeping feed at the lowest possible level. A traditional chain feeding system can also be installed.

Salmet proven manure drive system is used in the PS 2800 system giving you reliable manure removal.

All types of SALMET egg collection system, elevator and egg lift system can be installed.

#### About Salmet

Apart from being a manufacturer of poultry equipment, Salmet GmbH is also one of the larger egg producers in Germany, so we know what it means to design and produce poultry equipment. *We use what we produce!*

# SALMET®

## Options

- **Feed wagon or feed chain**
- **Adjustable legs**
- **Water line flushing system**
- **Shock wire**
- **Different number of nipples per cage**
- **Different types of egg collection**

**Reliable, durable  
and thoroughly tested  
poultry equipment.  
Proven worldwide since 1962.**
